Summary

Java Full Stack Developer with 7 months of professional frontend experience and hands-on experience building full-stack and AI applications. Built a modular e-commerce platform and an AI-powered document assistant focused on RAG, LLM integration, and document intelligence.

Technical Skills

Languages: Java, JavaScript, SQL
Backend: Spring Boot, Spring Security, Spring AI, REST APIs, GraphQL, WebSockets, JPA/Hibernate
Frontend: React, Redux Toolkit, React Router, Tailwind CSS, HTML5, CSS3
Databases & Caching: PostgreSQL, Redis, PgVector
AI & Generative AI: LLMs, RAG, Embeddings, Prompt Engineering, Semantic Search, Document Retrieval, Reranking, Conversation Memory, Structured Outputs, Guardrails, Tool Calling, Streaming
Cloud & DevOps: Docker, CI/CD, AWS
Testing & Monitoring: JUnit 5, Mockito, Prometheus, Grafana, Spring Boot Actuator, Micrometer
Tools: Git, GitHub, Gradle, Maven, Swagger/OpenAPI, Postman

Professional Experience

Frontend Developer Dec 2025 – Jul 2026
ve.ai *Hyderabad, India*

- Crafted responsive and reusable interfaces with **React, Tailwind CSS, and shadcn/ui,** translating Figma designs into production-ready screens across **20+ UI screens.**
- Connected REST APIs through **Axios** and implemented **WebSocket-based real-time interactions** to support dynamic application workflows.
- Implemented OAuth authentication, access-token handling, and form validation with **React Hook Form and Zod** across user-facing application flows.
- Engineered dynamic email widgets and actions driven by API-provided data, supporting **4+ email action types** across the application.

Projects

Modern E-Commerce Platform Live Demo | Backend | Frontend

- Developed a **modular monolith** covering authentication, user management, product catalog, reviews, cart, orders, coupons, and payments.
- Secured application flows by implementing JWT authentication, RBAC, email verification, password reset, validation, global exception handling, rate limiting, and Razorpay webhooks.
- Built persistence and caching with **PostgreSQL, JPA/Hibernate, and Redis**, with testing and observability using **JUnit 5, Mockito, Actuator, Micrometer, Prometheus, and Grafana.**
- Containerized and deployed the application using **Docker, GitHub Actions, Amazon ECR, EC2, Nginx**.

AI Knowledge & Document Assistant Live Demo | Backend | Frontend

- Built an AI-powered document assistant supporting PDF, DOCX, XLSX, PPTX, TXT, Markdown, and CSV document processing and conversational retrieval.
- Implemented **document extraction, token-based chunking, embeddings, pgvector similarity search, Top-5 retrieval, and Top-3 reranking.**
- Implemented **RAG orchestration, conversation context, guardrails, and WebSocket streaming** for document-based conversational interactions.
- Built asynchronous document processing with **AWS SQS/DLQ,** storing documents in **Cloudflare R2** and application data in **Neon PostgreSQL**.

Education

Visionary Degree College Hyderabad, IN
Bachelor of Computer Applications (BCA), ***GPA: 8.5/10*** *Jul. 2022 – Jul 2025*
