Summary

Java Full Stack Developer with 7 months of professional frontend experience and hands-on experience building full-stack and AI applications. Built a modular e-commerce platform and a document-based AI application focused on RAG, LLM integration, and document intelligence.

Technical Skills

Languages: Java, JavaScript, SQL
Backend: Spring Boot, Spring Security, Spring AI, REST APIs, WebSockets, JPA/Hibernate
Frontend: React, Redux Toolkit, React Router, Tailwind CSS, HTML5, CSS3
Databases & Caching: PostgreSQL, Redis, pgvector
AI: LLMs, RAG, Embeddings, Semantic Search, Document Retrieval, Conversation Memory, Guardrails, Streaming
Cloud & DevOps: Docker, CI/CD, AWS
Testing & Monitoring: JUnit 5, Mockito, Prometheus, Grafana, Spring Boot Actuator, Micrometer
Tools: Git, GitHub, Gradle, Maven, Swagger/OpenAPI, Postman

Professional Experience

Frontend Developer Dec 2025 – Jul 2026
ve.ai *Hyderabad, India*

- Developed **20+ UI screens** and reusable React components for chat, workspace, profile, team, settings, and email-related features.
- Translated Figma designs into **responsive and reusable UI components**, rendering content based on user selections, workspace context, and API responses.
- Integrated **REST APIs and WebSocket-based interactions**, handling API-driven content, loading states, error states, and real-time frontend workflows.
- Debugged and resolved **UI and functional issues** by tracing frontend behavior and API integration flows across existing application features.
- Refactored existing pages and components into **smaller, reusable components**, improving maintainability while adapting functionality to changing requirements and product priorities.

Projects

Modern E-Commerce Platform Live Demo

- Built and deployed a full-stack e-commerce platform using a **modular monolith**, with a custom **admin dashboard** for managing products, categories, orders, coupons, and users across 8 core business modules.
- Implemented **JWT authentication, RBAC, email verification, password reset, validation, global exception handling, and API rate limiting** using Spring Security and Redis.
- Created **30+ REST APIs** with **Spring Boot, JPA/Hibernate, and PostgreSQL** for product catalog, users, cart, orders, reviews, coupons, and payments, with pagination, filtering, and structured API responses.
- Integrated **Razorpay** for payment and refund workflows with secure webhook handling, ensuring reliable transaction updates and implementing caching with Redis for frequently accessed data.
- Added **JUnit 5, Mockito, Spring Boot Actuator, Micrometer, Prometheus, and Grafana** for testing and observability, and containerized deployment with **Docker and CI/CD on AWS**.

AI Knowledge & Document Assistant Live Demo

- Crafted an AI-powered document assistant supporting **7 document formats** with conversational retrieval and document processing.
- Designed **document extraction, token-based chunking, embeddings, pgvector similarity search, Top-5 retrieval, and Top-3 reranking**.
- Engineered **RAG orchestration using Spring AI**, conversation context, guardrails, and WebSocket streaming for document-based conversational interactions.
- Designed asynchronous document processing with **AWS SQS/DLQ**, storing documents in **Cloudflare R2** and application data in PostgreSQL.

Education

Visionary Degree College Hyderabad, IN
Bachelor of Computer Applications (BCA), ***GPA: 8.5/10*** *Jul. 2022 – Jul 2025*
