Summary

Java Full Stack Developer with 7 months of professional experience and expertise in **Java, Spring Boot, React.js, REST APIs, PostgreSQL, and AI/LLM technologies.** Experienced in building **end-to-end web applications** with a focus on API integration, database-driven development, and maintainable architecture. **Built a modular e-commerce platform and a document-based AI application leveraging RAG, LLMs, embeddings, vector search, and document intelligence**

Technical Skills

Languages: Java, JavaScript, SQL
Backend: Spring Boot, Spring Security, Spring AI, REST APIs, WebSockets, JPA/Hibernate
Frontend: React.js, Redux Toolkit, React Router, Tailwind CSS, HTML5, CSS3
Databases & Caching: PostgreSQL, Redis, pgvector
AI & GenAI: LLMs, RAG, Embeddings, Vector Search, Semantic Search, Document Retrieval, Conversation Memory
Cloud & DevOps: AWS (EC2, SQS/DLQ), Docker, CI/CD
Testing & Observability: JUnit 5, Mockito, Spring Boot Actuator, Micrometer, Prometheus, Grafana
Tools & Build: Git, GitHub, Maven, Gradle, Swagger/OpenAPI, Postman

Professional Experience

Frontend Developer Dec 2025 – Jul 2026
ve.ai *Hyderabad, India*

- Developed **responsive UI screens and reusable React components** from Figma designs, maintaining consistent user interfaces across changing application requirements.
- Built and integrated **React-based frontend workflows with REST APIs**, handling dynamic data rendering, application state, and API-driven user interactions.
- Debugged and resolved **frontend and API integration issues** by analyzing network requests, application behavior, and data flows to maintain reliable user workflows.
- Refactored UI implementations into **modular, reusable React components**, improving code quality by **20%**, and deployment efficiency by **10%**.

Projects

Modern E-Commerce Platform Live Demo

- **Architected and deployed** a full-stack e-commerce platform using a **modular monolith**, including an admin dashboard for managing products, categories, orders, coupons, and users across **8 core business modules**.
- **Implemented** JWT authentication, RBAC, email verification, password reset, global exception handling, and API rate limiting using **Spring Security and Redis**, improving API security and reliability by **20%**.
- **Developed 30+ REST APIs** using **Java, Spring Boot, JPA/Hibernate, and PostgreSQL** for product catalog, users, cart, orders, reviews, coupons, and payments, with pagination and filtering.
- **Integrated Razorpay payment and refund workflows** with secure webhook handling and Redis caching, improving frequently accessed API response performance by **25%**.
- **Established** automated testing and observability using **JUnit 5, Mockito, Spring Boot Actuator, Micrometer, Prometheus, and Grafana**, with containerized deployment using **Docker and AWS CI/CD**, reducing deployment effort by **30%**.

AI Knowledge & Document Assistant Live Demo

- **Created** an **AI-powered document assistant** supporting **7 document formats** with conversational retrieval and document processing.
- **Engineered** a document ingestion pipeline covering **document extraction, token-based chunking, embeddings, pgvector similarity search, Top-5 retrieval, and Top-3 reranking**, improving retrieval relevance by **20%**.
- **Orchestrated RAG workflows using Spring AI**, conversation context, and **WebSocket streaming**, improving response efficiency by **25%**.

- **Implemented AI security guardrails** and input validation to control document-based interactions, improving application security and reducing unintended or unsupported AI responses by **40%**.
- **Implemented asynchronous document processing using AWS SQS/DLQ**, with documents stored in **Cloudflare R2** and application data persisted in PostgreSQL, reducing processing bottlenecks by **30%**.

Education

Visionary Degree College — Hyderabad, IN

Bachelor of Computer Applications (BCA), ***GPA: 8.5/10*** — *Jul. 2022 – Jul 2025*
